Abstract (en)  
[origin: WO2020201071A1] The invention relates to the field of film-forming agents for cosmetic or dermatological use, that are capable of conferring a barrier effect or a fixative effect on a cosmetic preparation. The barrier effect makes it possible to protect the skin from environmental pollution, for example microparticles and volatile organic compounds, and more particularly from urban atmospheric pollution. The fixative effect makes it possible to reduce or eliminate the transfer of pigments and/or dyes, and to increase the hold of the hairstyle or the shaping of head hair, body hair or eyelashes.
