Abstract (en)

[origin: WO2020194080A1] The invention relates to an injection device having a cap (1) for removing a needle shield cap (10a) from a product container (10) and to a method for assembling an injection device. The cap (1) comprises an engagement element (4) which is intended to cause the removal of the needle shield cap (10a) from the product container (10) when the cap (1) is removed from the injection device.
