Abstract (en)
[origin: WO2020201365A1] The invention relates to a floor (10) for a container, the floor comprising at least one section (11,11',11") is, wherein the floor section (11,11',11") is formed from a single sheet element and includes a number of protruding elements (20', 20'', 20") and a base (28), the floor section (11,11',11") has a polygonal shape with a length (L) extending in a first direction (X) and a width (W) extending in a second direction (Y) being perpendicular to the first direction (X), each protruding element (20, 20', 20") includes a base element having two side walls (22,23) extending perpendicularly from a base (28) of the floor section (11,11',11"). The invention further relates to a method of manufacture of a floor section (11, 11', 11") for a container floor (10).
