Abstract (en)

[origin: WO2020200978A1] The invention relates to a roller for conveying sheets of glass, comprising at its surface a conveying zone for the sheets of glass, said roller comprising a rectilinear axis of rotation, the conveying zone forming a curved surface of revolution about said axis of revolution, said roller being asymmetrical on either side of its minimum or maximum extreme diameter. A plurality of said rollers can also serve to curve sheets of glass running by.
