Abstract (en)  
[origin: WO2020202235A1] Ironing apparatus (10) comprising an iron (11) provided with a steam assembly, configured to deliver steam following the activation of at least one steam delivery switch (19), and corresponding method to regulate the delivery of steam. The iron (11) comprises a base body (15), or base, in contact during use with the garment to be ironed, and an upper body (14) which comprises at least a grip of the iron (11), whereby the upper body (14) and the base body (15) are attached to each other in a mobile manner by connection means (24), wherein said steam delivery switch (19) can be selectively activated by the movement of the upper body (14) with respect to the base body (15).
