Abstract (en)

[origin: WO2020201857A1] A device (10) for the positioning and retention of a tension member within a profile (11) of a formwork panel. The device comprises a first tubular body (12) adapted to be inserted within a through hole (13) provided on the profile (11) of the formwork panel, the first body (12) having a wider abutment portion (14) arranged at one of its ends, the wider portion (14) being adapted to be in contact with the surface of the formwork panel that is directed toward the outside of the formwork.
