Abstract (en)

[origin: WO2020192840A1] The invention relates to an actuating unit (1) for automotive applications, in particular sliding door drives or motor vehicle door locks, having a plastic housing (2, 16, 17, 20), a drive (4) arranged in the housing, in particular a worm drive (3, 8), an actuator (9) that can be acted on by the drive (4) and at least one sliding bearing (7) for receiving a bearing point of the drive (4), in particular a worm (3) of the worm drive, wherein some regions of the sliding bearing (7) are supported in plastic, and wherein the plastic mounting (11) can be inserted between the sliding bearing (7) and a housing part (2, 16, 17, 20) as a separate component.
