Abstract (en)

[origin: WO2020200969A1] The invention relates to a household cooking appliance (1) having a cooking chamber (103), delimited by a cooking chamber wall (104-106), and a cooking chamber camera (3), located outside of the cooking chamber (103), for capturing images from the cooking chamber (103) through a viewing opening (107) in the cooking chamber wall (104-106), wherein the cooking chamber camera (3) is movable by the household cooking appliance (1) between a resting position (RP) and a capturing position (AP), the cooking chamber camera (3) is subject to more heat from the cooking chamber in the receiving position (AP) than in the resting position (RP), and the household cooking appliance (1) is designed to move the cooking chamber camera (3) during an operating sequence, in order to capture an image, from the resting position (RP) into the capturing position (AP) and back into the resting position (RP) after the capture. A method according to the invention relates to operating a household cooking appliance (1). The invention can be particularly advantageously applied to ovens.
