Abstract (en)

[origin: WO2020193073A1] The application relates to a system for providing operational data of a vehicle component, in particular of a component of an air supply system of a rail vehicle, said system comprising: at least one detector for capturing the operational data of the vehicle component; a transmitter coupled to the at least one detector, for transmitting the operational data of the vehicle component to an external memory device for storing the operational data; and an identification number of the component, said number being provided on the vehicle component.
