Abstract (en)
[origin: WO2020204727A1] A power adaption circuit and a method for limiting current draw from an output port on a measuring instrument, wherein the power adaption circuit comprises a current limiter 2, 3, 2', 3' adapted to limit the current draw from the output port depending on a limiting parameter 8, 8', so that the maximum current draw from the output port is determined by the measuring instrument to 5 which the output port is connected.
