Abstract (en)

[origin: EP3949771A1] Provided is a heat-not-burn smoking article in which filtration of a smoking flavor component through a filter is reduced even in use at a heating temperature of 230°C or lower. A heat-not-burn smoking article according to the present invention includes a tobacco filler containing tobacco and an aerosol former; and a filter disposed downstream of the tobacco filler, where the tobacco filler is a tobacco filler that provides an aerosol having a pH of 7.8 or less.
