Abstract (en)

A sole (1) for shoes (10), which is constituted by a single element made with a compound based on expandable and cross-linkable polyolefins, commonly known as expanded ethylene vinyl acetate (expanded EVA), which comprises transverse grooves (2) distributed on two mutually opposite faces. A first face is designed to abut, directly or indirectly, against the foot of the user, a second face is designed to abut, directly or indirectly, against the ground during use.
