Abstract (en)

[origin: WO2020207960A1] The invention relates to a method for producing a hollow shaft from a tubular preform by means of pressure rolling, wherein each end of the preform is shaped using at least one forming roller, a tubular preform (1) with a round or polygonal cross-section is used, and the preform (1) is held on a workpiece holder (2) in the central tube region (1a) during the entire production process until the hollow shaft is completed.
