Abstract (en)

[origin: WO2020207693A1] The invention relates to a unit (1) comprising: - a casing (2) forming an internal space, a first surface of the casing (2) comprising an opening (3), and a second surface of the casing (2) comprising a port (4), and - a duct (5) for a subwoofer comprising a main portion defined by first and second open ends, the first end being connected to the casing (2), the opening of which corresponds to said port (4), thus forming an input, the second end being configured to lead to the outside, thus forming an output (6), said unit (1) being characterised in that the main portion of the duct (5) has a cross-sectional area the geometry of which varies between the two ends thereof, the first end of the duct having a different geometric shape from the second.
