Abstract (en)

[origin: WO2020208210A1] The invention relates to a method for lowering the oxidising power of a liquid or semi-liquid organic composition, as well as of the so-called free organic composition that can be obtained by this method. It also relates to a free organic composition that can be obtained by the method of the invention, as well as to a food, cosmetic or chemical composition or a pharmaceutical composition containing said composition treated by said method.
