Abstract (en)

[origin: WO2020207878A1] Multi-disc clutches are known which usually have a first clutch pack consisting of steel discs and a second clutch pack consisting of friction discs. An object of the invention is to create a disc which has a particularly cost-effective design. To this end, a disc (1) for a multi-disc clutch is proposed, which has a disc body (2), the disc body (2) being in the form of an annular disc, and the disc body (2) having a driver contour (5) on its inner circumference (4) and/or outer circumference (3) for mounting the disc (1) in a rotationally fixed manner, wherein the disc body (2) is formed by edgewise rolling on the inner circumference (4) thereof.
