Abstract (en)
[origin: WO2020207529A1] The invention relates to an arrangement consisting of a first modular circuit board plug connector (1) and at least one second modular circuit board plug connector (1') for installation on a printed circuit board, wherein the circuit board plug connectors (1, 1', 1'', 1''', 1IV, 1V) are each composed of a plurality of individual plug connector modules (2, 2', 2'') and the plug connector modules (2, 2', 2'') are each arranged in rows on at least one connector (4) and reversibly fastened thereto, wherein the first circuit board plug connector (1) and the at least second circuit board plug connector (1') are reversibly connected together via a coupling element (5, 5', 5'', 5''').
