Abstract (en)

[origin: WO2020207796A1] The invention relates to a device for introducing cables through an opening with a frame arranged around the opening, which has slots for elastic cable grommets. According to the invention, a coupling housing of a coupling of a plug connection is designed as a single piece with the frame or with a breadboard matching one of the slots, wherein the coupling housing, the part of the frame connected to same and/or the breadboard are designed to be screwed together with a plug connector housing of an inserted plug of the plug connection or to be clamped with at least one bar.
