Abstract (en)

[origin: WO2020211967A1] The invention relates mainly to an arrangement of pockets on a clothing garment comprising at least one main pocket (2) and a compartment pocket (9, 9a, 9b) which has at least one back (15, 19a, 19b) and a front (10, 10a, 10b) of which the upper edge (11, 11a), 11b) defines the inlet opening (12, 12a, 12b) thereof, a lower portion (17, 17a, 17b) housed, for at least one stored use position of said compartment pocket (9, 9a, 9b), inside said main pocket (2), and an upper portion (18, 18a, 18b) visible in the same so-called stored use position. Advantageously, the invention also relates to the compartment pocket (9a, 9b) which is secured to said clothing garment (23) at the upper portion thereof (18a, 18b) while granting said compartment pocket (9a, 9b) mobility between at least the stored use position in the main pocket (2) and a separated use position outside the main pocket (2).
