Abstract (en)

[origin: WO2020212052A1] The invention relates to a retraction device (1) for a movable part (5), in particular for a furniture part, comprising a rotatably mounted lever (3), which can be coupled to the movable part in an angular range between two end positions in order to brake or accelerate the movable part, wherein the lever (3) is pre-stored in one end position via an energy accumulator (7) and the lever (3) is connected in an articulated manner to a connection element (6) guided along a guide path (26).
