Abstract (en)  
[origin: WO2020210847A1] The invention relates to a vehicle combination which comprises a perambulator (1) and a trailer (2, 12) connected thereto, the trailer (2, 12) comprising a platform (6, 19) and casters (10, 20) which support the platform on the ground. The vehicle combination has two retaining devices (4, 5; 14, 15) for connection to a children's bicycle (3, 13). The first retaining device (4, 14) is located on the trailer (2, 12) and is provided in order to fix a wheel of the children's bicycle (3, 13). The second retaining device (5, 15) is located on the perambulator (1) and is provided in order to fix the region of the children's bicycle (3, 13) which is located near the handle region of the perambulator (1) if the children's bicycle is pivoted upwards about the axis of the wheel fixed on the retaining device (4, 14) on the trailer (2, 12).
