Abstract (en)
[origin: WO2020212037A1] The invention relates to a plastic closure of a tubular outlet fitting (1) of a container, having a closure cap (2), which is fastened on the fitting (1) in a releasable manner in particular via a thread (3), wherein the cap (2) is permanently connected to the fitting (1) via a retaining strip (4), wherein, when the fitting axis (8) is in a vertical state, the retaining strip (4) is fastened on the fitting (1) by way of a first lower end and, from there, runs upwards, by way of a first strip region (4a), along the side of the cap (2) and, when the cap (2) is in the closed state, said retaining strip has a bent-over portion (4c) in the upper region in order to run downwards again, by way of a second strip region (4b), as far as its second lower end, which is fixed to the cap (2).
