Abstract (en)

[origin: WO2020212261A1] The present invention relates to a combination appliance comprising: a hob (10) with at least one cooking module (101); a fume extraction device (11), at least part of which is located below the at least one cooking module (101) and which has a fan (110) having at least one air inlet opening (1101) and a filter unit (114) having at least one grease filter (1141); and a suction opening (111) for the fume extraction device (11), said suction opening being located in the hob (10). The combination appliance is characterised in that the fan (110) is located below the suction opening (111), the filter unit (114) is located at the suction opening (111), and the fume extraction device (1) has a separating plate (1143) which separates the filter unit (114) from the fan (110) located below same.
