Abstract (en)

[origin: WO2020212178A1] The invention relates to a method for suppressing noise in audio signals in a vehicle (1), comprising: providing a noise suppression filter (18), which is designed to at least partially suppress a noise component in an audio signal; receiving a vehicle speed value; specifying at least one property of the noise suppression filter (18) in accordance with the received vehicle speed value. The invention further relates to an assembly, to a vehicle, and to a method for suppressing noise in emergency calls that occur.
