Abstract (en)

A track beam installation system for assisting the fixation of a track beam to a wall structure, comprising: a metal plate, demountably attachable to the wall structure; and a track holder, configured to securingly receive the track beam and which is adapted to affixingly engage with said metal plate, during use. A method of using a track beam installation system to assist the fixation of a track beam to a wall structure, comprising the steps of: attaching a metal plate to a wall structure; providing a track holder to securingly receive at track beam; and affixingly engaging said track holder with said metal plate so as to movably secure the track beam to the wall structure.
