Abstract (en)

[origin: WO2020216455A1] The invention relates to a shaping method comprising the following steps: - introducing a tube (104) into an opening in a die (101), the opening having at least one region having a smaller circumference than an outer circumference of the tube (104); and then - moving the die (101), the tube (104) being internally hollow during the movement or an inner tool being arranged inside the tube (104) during the movement in the region of the die (101), said tool being removed from the tube (104) after the movement has ended.
