Abstract (en)
[origin: WO2020215110A1] The invention relates to a modular swimming pool (1), wherein each swimming pool module (2) has a base element (3) and at least one wall element (4) connected to the base element (3), wherein the swimming pool modules (2) define a pool interior (5) by being joined together, wherein the base element (3) and the wall element (4) of at least one swimming pool module (2) have reinforcing ribs (6) and wherein the reinforcing ribs (6) of the wall element (4) extend in the direction of the base element (3), wherein the reinforcing ribs (6) are arranged at a distance from one another and form open chambers (7) on the outer surface, which are designed to be completely filled with a binding agent (8) when placed on a substantially flat mounting surface (9), wherein the pool interior (5) has at least one in particular wedge-shaped depression (13) in the region of the base element (3), which forms a continuous channel region of the pool interior (5), wherein the reinforcing ribs (6) of the base element (3) are connected to an outer surface of the depression (13) facing away from the channel region, which borders the open chambers (7).
