Abstract (en)  
[origin: WO2021104593A1] In the external screening arrangement (1) for a roof window, a set of side covers (30) is configured to be connected to the frame structure of the roof window. The screening arrangement comprises a positioning device (40) to provide at least temporary, releasable engagement with engagement means (33) of the respective side cover (30). The positioning device (40) is configured to be fastened to the roof window (2) in the mounted condition of the screening arrangement (1), and comprises a clip (40) providing snap engagement with the engagement means (33) of the side cover (30).
