Abstract (en)
[origin: EP3960013A1] The method of manufacturing a glove, which glove comprises top layer (10), an outer surface (12) and an inner surface, comprises a step of providing the inner surface with pathogens inactivating compounds. Inner surface is the surface, which is configured to be in skin contact when the glove is worn in hand. The method may comprise a step of manufacturing a lining (18), said lining having an inner surface and attaching the lining inside the top layer, whereby the inner surface of the lining forms the inner surface of the glove.
