Abstract (en)

A method of installing a control suitable for use in an ablutionary setting, comprising the steps: affixing a back plate to a mounting surface, the back plate comprising; a first valve, the first valve comprising a control lever; and an actuator comprising a first surface and a second surface, the first surface configured to contact a surface of the control lever; adjusting the actuator such that the distance between the first surface and second surface is lengthened or shortened; affixing a faceplate to the back plate, the faceplate comprising a control member arranged to operably connect to the second surface of the actuator.
