Abstract (en)

[origin: WO20221815A1] The present invention relates to an apparatus to be used for heating an aerosol generating material to generate an inhalable aerosol and/or gas. The present invention also relates to a method for heating an aerosol generating material to generate an inhalable aerosol and/or gas. An object of the present invention is to provide an apparatus to be used for heating an aerosol generating material to generate an inhalable aerosol and/or gas, wherein the aerosol generating material is in the form of a sheet of aerosol generating material.
