Abstract (en)
[origin: WO202221853A1] The present invention concerns the use of electrically conductive nanocomposite particles comprising a core constituted by a C1-C6 alkyl polyacrylate homopolymer or a C1-C6 alkyl acrylate copolymer and an α,β -unsaturated amide comonomer, a shell constituted by polyaniline, and a non-ionic surfactant for printing on a stretchable substrate. It also concerns a printed stretchable substrate obtained according to the invention and usable, for example, in the field of printed electronics or connected clothing.
