Abstract (en)

[origin: WO202223657A1] Disclosed herein are methods of diagnosing one or more conditions, including endometriosis, cancer, or a combination thereof. The methods may also include identifying a likelihood or risk of developing one or more conditions. Disclosed herein are methods and compositions for treating one or more conditions, such as by administering one or more pharmaceutical compositions in unit dose form. The treating may include prophylactic treating. Methods may include detecting one or more mutations in a genetic material obtained from a subject, such as a subject in need thereof.
