Abstract (en)  
[origin: WO2020221538A1] The invention relates to a closing device for closing a housing opening, in particular a housing opening in an electrical door-drive housing, comprising: a frame, which defines a frame opening and is designed to be inserted into the housing opening to be closed and, in particular without additional aids, to be fastened to the housing; and a cover, which is or can be detachably connected to the frame and by means of which the frame opening can be closed in cooperation with the frame.
