Abstract (en)  
[origin: WO2020225478A1] A mounting element (12, 12a), reader device (11) and method of mounting the reader device on a water meter (1) of a water pipe system (2) of a building (3). The mounting element comprises a frame part (31) and several friction surfaces movable relative to the frame part. The mounting element further comprises a force element for moving the friction surfaces and generating friction forces. The reader device is thereby mounted to the water meter by means of friction forces. Further, the reader device is provided with sensing device (17) for reading water meter readings and a data communication device (19) for sending the gathered data further on.
