Abstract (en)

[origin: WO2020221568A1] The invention relates to a driver information system (10) for a vehicle, having a display device (12) by means of which a graphical user interface (18) can be displayed. The graphical user interface (18) comprises links (30) to services (26.1 – 26.3), and the services (26.1 – 26.3) can be displayed on the display device (12) when an associated link (30) is actuated. The driver information system (10) comprises a main search function (28) which is configured to determine, according to a search input, search results both of the graphical user interface (28) and of the services (26.1 – 26.3). The invention further relates to a method for searching a driver information system of a vehicle.
