Abstract (en)

[origin: WO2020229130A1] The invention relates to a drive system (3) for a switch (17), said drive system (3) containing a driveshaft (16) which connects the drive system (3) to the switch (17); a motor (12) for driving the driveshaft (16); a feedback system (4) which is designed to determine at least one value for the position of the driveshaft (16) and generate a feedback signal on the basis of the at least one value; and a controller (2) which is designed to influence the operation of the motor (12) on the basis of the feedback signal.
