Abstract (en)
The invention relates to a flashing assembly (60) for a roof penetrating structure, a method of mounting a flashing assembly and a roof structure (19). The flashing assembly (60) comprises a skirt member (20) configured for at least partly covering roof covering elements (51) facing the bottom of the roof penetrating structure (19), a flange member (40) positioned in extension of the skirt member (20) where the flange member (40) has an inner surface, adapted to face in an interior direction towards an interior of the building and is adapted to lay flat and follow the surface of the roof covering elements (51), the flange member (40) being formable for substantially permanent deformation and comprising an elastomer being plastic and/or a textile.
