Abstract (en)

[origin: WO2020225516A1] The invention concerns a unit for rearing insect larvae comprising at least one row (1001, 1002) of at least two trays (1100, 1200, 1300) placed one on top of the other, the unit being characterised in that the trays (1100, 1200, 1300) have rearing surface areas of different dimensions suited to the stage of development of the larvae they contain, and in that each tray comprises a means for controlling the temperature of its rearing surface.
