Abstract (en)  
[origin: WO2020225321A1] A fragrance cartridge for dispensing a fluid fragrance is provided. The cartridge comprises a cartridge body and a cap associated with the cartridge body. The cartridge body has an inner cavity for housing a fluid fragrance, a resealable membrane for dispensing fluid fragrance and a plunger to force fluid fragrance out of the inner cavity through the resealable membrane. The cap comprises a needle in correspondence with the resealable membrane. The cartridge body and the cap are relatively movable with respect to each other between a sealed position in which the needle remains outside the inner cavity and a dispensing position in which the needle accesses the inner cavity through the resealable membrane. A perfume dispensing device and method for dispensing fragrance are also provided.
