Abstract (en)

[origin: WO2020224776A1] The present invention discloses a washing process for producing a wash out effect in a textile, comprising or consisting of washing a textile in a washing machine, wherein the washing machine is loaded with the textile and at least one abrasive. Furthermore, an abrasive for producing a wash out effect at a textile and the use of a rope as a mechanical abrasive are disclosed. The abrasive comprises or consists of a rope (10) comprising a first end section (12) with a first rope end (14), a second end section (16) with a second rope end (18), and at least one knot (20), the at least one knot (20) being formed between the first end section (12) and the second end section (16) of the rope (10), wherein the at least one knot (20) has a first intersection point (22), at which the first end section (12) protrudes from a first loop (24) which is made by the knot (20), and a second intersection point (26), at which the second end section (16) protrudes from a second loop (28) which is made by the knot (20), wherein a length L1 of the first end section (12) is defined by a first distance between the first intersection point (22) and the first rope end (14) and a length L2 of the second end section (16) is defined by a second distance between the second intersection point (26) and the second rope end (18), wherein the length L1 of the first end section (12) is L1 \leq 3.0 cm and the length L2 of the second end section (16) is L2 \leq 3.0 cm, wherein a thickness T of the rope is 0.5 cm \leq T \leq 3.0 cm.
