Abstract (en)

[origin: WO2020225380A1] The invention relates to a floor covering segment laying apparatus (1) for laying floor covering segments (5) on floors (6). In order to allow even large areas to be simply and rapidly provided with floor covering segments (5), according to the invention the floor covering segment laying apparatus (1) comprises a laying device (2), a supply device (3) and a transport device (4), wherein the laying device (2) is designed to lay floor covering segments (5) in an automated manner, the supply device (3) is designed to supply floor covering segments (5) to be laid to the laying device (2) in an automated manner, and the transport device (4) is designed to transport the laying device (2) to a laying region of a floor (6) in an automated manner, on which floor floor covering segments (5) are intended to be laid.
