Abstract (en)
[origin: CA3143883A1] The invention relates to an uncoupling web (1), in particular intended for use in a surface covering structure (2) that can be covered with cover elements, preferably tile coverings, said web comprising a carrier web (3) and a plurality of knobs (5) protruding from the carrier web plane (4), the material of the carrier web (3) being a preferably thermoplastic plastic material. According to the invention, the material of the carrier web (3) comprises and/or consists of a copolymer containing ethylene and vinyl acetate, in particular a copolymer of ethylene and vinyl acetate, preferably ethylene vinyl acetate (EVA).
