Abstract (en)
[origin: EP3967186A1] The present invention describes a sofa bed comprising a mattress (1), a rigid bedstead (3) intended to be the base of the mattress (1), backrest supports (5) and a frame that forms a chest (4), the bedstead being attached to the frame by means of a folding system, wherein the sofa bed comprises a fixing sheet (2) located between the mattress (1) and the bedstead (3), of similar dimensions to the bedstead (3) and fixed to the bedstead (3) on a central area, leaving the perimeter area free to be able to tuck in the sheets, so that a frequent folding of the bedstead (3) does not undo the bed.
