Abstract (en)
[origin: WO2017143378A1] The invention relates to an actuating arm drive (1) for at least one pivotably mounted actuating arm (2), in particular for driving a flap (4) of a piece of furniture (3), having a plurality of levers (6, 7, 8, 9, 10) which are accommodated at least partially in a housing (5) which can be mounted on the piece of furniture (3), wherein the levers which act on or form the actuating arm (2) project out of an end face (51) of the housing (5) at least in the open position of the actuating arm drive (1), wherein - in the closed position of the actuating arm drive (1) - at least two levers (6, 7) connected to one another in an articulated manner project out of a long side (52) of the housing (5) preferably directly adjoining the end face (51).
