Abstract (en)
[origin: WO2020233843A1] A rear wall connector for drawers (1) comprises a carrier (8) that can be fixed to a sidewall (5) and a connection part (10) fixed to the carrier (8), the detent means (11), which can be latched to or in a detent receptacle (11) on a rear wall (3), and a securing part (12) which is mounted linearly displaceably in the connection part (10) and is movable from a protruding position into a securing position fixing the detent means (11), at least one bearing face (18) for a rear wall (3') being formed with a screw channel (15) on the connection part (10), the securing part (12) being oriented substantially flush with the bearing face (18) of the connection part (10) in the securing position. The assembly and fastening of a rear wall to a drawer are thereby simplified.
