Abstract (en)  
[origin: WO2020233966A1] The invention relates to a side panel (4) for a drawer (1), having means (5) on a front side for connection to a front panel and means (9) on a rear side for connection to a rear wall (3), wherein the side panel (4) has a single-part or multi-part covering (7, 8) and a plurality of molded parts (11, 12, 13, 15, 17) inserted into each other, which form a core (10) for the covering (7, 8), wherein an equalizing element (14) is provided between at least two molded parts (12, 13), and the distance between the two molded parts (12, 13) in the longitudinal direction of the side panel (4) is adjustable by elongating or compressing the equalizing element (14). The invention furthermore relates to a method for producing a side panel (4).
