Abstract (en)
[origin: WO2020229492A1] The invention relates to a device (100) for closing a cooling module (500) of a motor vehicle, configured to support a motorised propeller (503) intended for guiding an air flow (F) through heat exchangers (502) of the cooling module (500). The closing device (100) according to the invention comprises a rigid skeleton (1) and a skin (2) for covering the rigid skeleton (1), the rigid skeleton (1) and the covering skin (2) being made of different materials.
