Abstract (en)
[origin: WO2020232483A1] The invention relates to a furniture fitting (1) for movably mounting a furniture part (2), preferably a furniture flap, relative to a furniture body (3), comprising a first fitting part (4) for fastening to the furniture body (3) and a second fitting part (5) for fastening to the movably mounted furniture part (2). The two fitting parts (4, 5) are pivotally interconnected or can be pivotally interconnected, and at least one of the two fitting parts (4, 5), preferably the first fitting part (4), is designed to be arranged at least partially, preferably completely, in a recess (6) in the furniture body (3) or in the movably mounted furniture part (2). The furniture fitting (1) comprises at least one fastening device (7) for fastening the at least one fitting part (4, 5) in the recess (6), the at least one fastening device (7) comprising at least one rotatably mounted actuating element (8) and at least two fastening elements (10) which can be at least partially recessed in a wall (9) of the recess (6) and/or can be pressed against the wall (9). A coupling device (12) is provided, by means of which a rotation of the at least one actuating element (8) can be converted into a recessing movement and/or into a pressing movement of the at least two fastening elements (10). The at least one actuating element (8) and the at least two fastening elements (10) are arranged on the same side (13), preferably on a long side, of the at least one fitting part (4, 5) and spaced apart from one another in a longitudinal direction (14) of the at least one fitting part (4, 5).
