Abstract (en)

[origin: WO2020229111A1] The invention relates to a hydraulic supply system (10) for at least one vehicle, in particular a rail vehicle, comprising at least one drive motor (12), at least one flange (14), at least one hydraulic pump (16) and at least one control plate (18) for receiving and/or controlling further electrical and/or hydraulic components (20) of the hydraulic supply system (10), wherein, in the mounted state, the flange (14) is secured on the drive motor (12) and on the hydraulic pump (16) for the mutual mechanical coupling thereof, and wherein the flange (14) is secured on the control plate (18), wherein the flange (14) also has at least one connector (26) for coupling the hydraulic pump (16) to the control plate (18), and wherein the flange (14) has at least one electrical coupling element (28) for electrically coupling the drive motor (12) to the control plate (18).
